W16-001 – Ward 16 welcome: edit decision list (v2, as cut)

Status: **cut as v2** (`W16-001-ward16-welcome.mp4`). Word timings, the spoken text and the take choice still need a check by ear.

Speaker: a real Tamil-speaking Medical Officer. Rules for this edit:

- **No face replacement:** his face and identity are not changed.
- **No synthetic voice:** the audio stays his own recording. The only changes allowed are clean-up and levelling.
- **No invented content:** nothing clinical and no hospital facilities that were not filmed are added.
- **Red-flag statements:** none are in this clip's script. If the W16-001 plan contains any, they must be subtitled word for word, with no paraphrasing or shortening.

1. Source media

ID	File	What it is	Use?
S1	`03fab735-…3.34.45_PM_2.mp4` (12.17 s, 1920×1080)	**Export of an earlier edit**: title card 0–5.0 s + clip with burned-in subtitles	**No.** Burned subtitles cannot be removed cleanly; use only as a reference
R1	`27b693fe-…1.15.49_PM.mp4` (7.07 s, 1280×720)	Original phone recording, MO at plain wall	Yes, as the camera original
R2	`1f9e1945-…1.19.34_PM.mp4` (6.87 s)	Original, alternate take	Yes (alternate)
R3	`d089cb1b-…1.21.08_PM.mp4` (6.83 s)	Original, alternate take	Yes (alternate)

| B1 | `assets/ward16-entrance.webp` (photo, 1500×2000) | **Real** Ward 16 entrance: "16" and the K. Subramaniam Memorial Orthopaedic Ward sign | Yes, B-roll | | B2 | `assets/ward16-corridor.webp` (photo, 1500×2000) | **Real** Ward 16 corridor: trolley, wheelchair, visiting-hours notice, no patients | Yes, B-roll |

v2 cut uses R3 (`d089cb1b…1.21.08_PM`). Its audio waveform matches the supplied exports best (correlation 0.65, compared with 0.57 for R2 and 0.52 for R1), and the export was made from this take. Confirm this is the approved take.

2. Edit decision list (timecodes in seconds; record = finished video)

#	Record in–out	Source	Source in–out	Content	Notes
1	0.00–5.00	Graphic	–	Title card: **எலும்பியல் விடுதி 16க்கு வரவேற்கிறோம்** / Welcome to Orthopaedic Ward 16	Text only; check spelling against plan
2	5.00–6.30	R3	0.00–1.30	MO, hands joined: "வணக்கம்!"	His full clip runs under everything below; his audio is never cut
3	6.30–8.10	B1 over R3 audio	1.30–3.10	Ward 16 entrance photo, slow 5 % push-in	Covers "...கிளிநொச்சி மாவட்ட பொது வைத்தியசாலையின்..." (estimated)
4	8.10–9.70	B2 over R3 audio	3.10–4.70	Ward 16 corridor photo, slow 5 % push-in	Covers "...எலும்பியல் விடுதி 16க்கு..." (estimated)
5	9.70–11.90	R3	4.70–6.83	MO to camera: "...உங்களை அன்புடன் வரவேற்கிறோம்."	Face kept for the welcome
–	–	–	–	**Speech detected** in S1 from about 5.07 s to the end, with no pause longer than 0.3 s	One continuous line, so no internal cuts are needed

Transitions: 0.25 s cross-dissolve in and out of each photo; 0.3 s fade on the clip; 0.6 s fade on the title card. No jump cuts in his speech. **The B-roll word timings are estimates, so check by ear** and move rows 3–4 if needed (edit `BROLL` in `edit_w16_001.py`).

3. B-roll

Do not use the AI-generated ward clips (takes A, B, C, G, H) as B-roll in this video. They show synthetic corridors, beds and signs that are not DGH Kilinochchi, and in a real officer's presentation patients would read them as the actual ward.

Line (approx.)	Shot used	Status
"...கிளிநொச்சி மாவட்ட பொது வைத்தியசாலையின்..."	B1 Ward 16 entrance (stand-in)	**Hospital exterior / main entrance still MISSING**; swap in when filmed
"...எலும்பியல் விடுதி 16க்கு..."	B2 Ward 16 corridor	Available (real photo)
"...உங்களை அன்புடன் வரவேற்கிறோம்"	Back on the MO	Available (R3)

The photos show no patients and no patient information. Photo colour was lifted only slightly (brightness +8 %, contrast +5 %). Each portrait photo sits on a blurred fill of itself, because the frame is 16:9.

Filming notes:

- **Consent:** no patients' faces without written consent.
- **Information:** no patient names or charts in shot.
- **Approval:** get the Director's approval to film on the ward.

4. Audio clean-up guidance (his real voice only)

Step	Setting used in the current edits	Limit
High-pass	80 Hz	Removes rumble and handling noise
Noise reduction	FFT denoise, about −25 dB noise floor	Stop if the voice sounds watery or metallic
Compression	3:1 above −20 dB, 5 ms attack, 100 ms release	Gentle levelling only
Loudness	−16 LUFS integrated, −1.5 dBTP peak	Matches the other videos in the series
Not allowed	Voice cloning, AI speech generation, pitch or timbre change, re-voicing	–

A person must listen to the result on headphones before export. The automated checks here cannot listen to audio.

5. Colour correction (modest)

Current settings:

- **Curves:** a gentle lift (0.25 to 0.30, 0.5 to 0.58).
- **Contrast and saturation:** contrast 1.06, saturation 1.15.
- **Warmth:** slight warm balance (red +0.03 to +0.04, blue −0.02 to −0.03).
- **Vignette and sharpening:** light vignette (π/9), mild sharpening.

Must be checked:

- **Skin tone:** skin must look like him in person, not lighter, darker or smoothed.
- **Not allowed:** beauty filters, face retouching or skin smoothing.

The current edits also zoom in 1.25× to remove the light fitting and empty wall. This is reframing only. Confirm it is acceptable under the plan.

6. Tamil subtitles (manually checkable)

The text below is the **script supplied by the requester**, not a transcription.

- **Check every word against his actual speech.** Where he says something different, subtitle what he actually says.
- **The English line** is a translation for reference only.

> 1
> 00:00:05,100 --> 00:00:12,000
> வணக்கம்! கிளிநொச்சி மாவட்ட பொது வைத்தியசாலையின் எலும்பியல் விடுதி 16க்கு உங்களை அன்புடன் வரவேற்கிறோம்.
> Hello! A warm welcome to Orthopaedic Ward 16 of District General Hospital Kilinochchi.

Checks for the reviewer (tick each one):

- [ ] **Words match:** the words match his speech exactly, including "16க்கு" or "பதினாறுக்கு", whichever he says.

- [ ] **Spelling:** வைத்தியசாலையின் is spelled with த் (the supplied script had "வைதியசாலையின்").
- [ ] **Timing:** the subtitle appears when he starts speaking and stays until he finishes.
- [ ] **Red-flag statements:** none in this clip. If the plan adds any, quote them word for word.
- [ ] **Sign-off:** a Tamil-speaking clinician signs off the final wording.

7. Flags / missing items

1. **No separate W16-001 scene plan supplied.** This EDL is used as the plan; confirm it.
2. **The supplied videos were edited exports** with burned-in subtitles. The v2 cut was rebuilt from camera original R3.
3. **No hospital exterior / main entrance footage**; the Ward 16 entrance photo stands in (see §3).
4. **The spoken content has not been verified by ear.** The subtitles are the script, not a transcription.
5. **AI-generated takes A, B, C, G, H** show synthetic facilities and should not be presented as the real ward.
